

# PCR Prep Made Easier

PCR prep is more than just primers, enzymes, and reagents. SP Bel-Art provides the tools necessary to make sure your PCR prep workflow is efficient and organized.

## Sanitation

**Lab Coat/Apron Hook**  
Easy access to a lab coat at each work station.

**Labmat Bench Liner Sheets**  
Keep integrity of your samples by limiting and absorbing spills and contamination.

**Trigger Sprayer With 53mm Adapter**  
Turn safety-labeled wash bottles into convenient spray bottles.

**GHS Labeled, Wide Mouth, Safety-Vented, 500ml Bleach Wash Bottle**  
Prevent contamination - keep 10% bleach solution properly marked and close at hand.

## Thawing

**Microcentrifuge Tube Openers**  
One-handed MCT and PCR tube opening without the need to change gloves between samples.

**Microcentrifuge Tube Ice/Rack**  
Keep reagents, enzymes and buffers cold and accessible during prep work.

## Mixing

**Poxygrid Bench-Top Biohazard Bag Holder Kit**  
Compact and easy pipette tip disposal.

**6 Place Pipette Stand**  
Stores Pipettes for easy access.

**Bel-Art Pens**  
Write with ease on tape or paper, wet or dry!

**Compact PCR Storage Racks**  
Color-code your sample preps.

**Tech Pens**  
Ensure ink won't rub off when storing samples from -46° to 65°C.

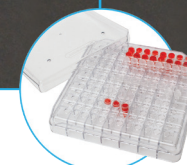

## Reagent and Sample Storage

**Write-On Label Tape & Dispenser**  
Keep track of samples with labels that stay adhered at -20°C.

**Frio Temp Calibrated Dual Zone Electronic Verification Thermometer**  
Ensure PCR reagents are always stored at the correct temperature.

**PCR Tube Freezer Storage Box**  
Maximize storage space and efficiency, even at low temperatures.

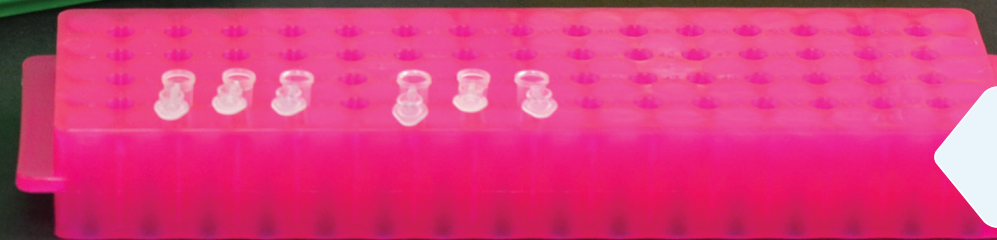

**Roxy M™ Repeating Pipettor**  
Precise, accurate, and reliable repetitive pipetting.

**Magic Touch 2 Icewares**  
Keep enzymes, buffers, nucleotides cold during prep work.

**Mini Cryo Boxes**  
Organized cold storage from freezer to benchtop.

**80-Well Reversible PCR and Microcentrifuge Tube Racks**  
Conveniently holds PCR or MCT tubes while mixing.
